Summary

Aspiring Machine Learning Engineer with a solid understanding of machine learning algorithms, data structures, statistical analysis, and software development. Proficient in Python, SQL, Scikit-learn, TensorFlow, and data visualization tools, with practical experience building AI and data science projects. Strong problem-solving, analytical, and teamwork skills, seeking an opportunity to apply machine learning expertise and continuously grow while delivering impactful solutions in a dynamic technology organization.

Skills

Programming Languages: Python, C++, SQL

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Microsoft Excel

Machine Learning: Scikit-learn, TensorFlow, PyTorch, Supervised Learning, Unsupervised Learning, Model Evaluation, Feature Engineering

Data Science: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Data Preprocessing, Feature Selection, Insight Generation

Tools: Git, GitHub, Jupyter Notebook, VS Code, MySQL

Projects

RescueAI – Offline Emergency Assistant (Ongoing) | *React.js, FastAPI, Python, SQLite, Ollama, OpenCV, YOLOv8* **2026**

- Developing an offline AI-powered emergency assistance platform to provide first-aid guidance, CPR instructions, and disaster support without internet connectivity.
- Integrating an offline LLM chatbot (Ollama), EasyOCR, and YOLOv8-based object detection for voice-assisted emergency response and medical assistance.
- Building a React.js frontend with a FastAPI backend and SQLite database to ensure reliable offline performance and efficient emergency data management. 🔗 [Click Here](#)

Braille Vision – Braille Recognition System | *Python, YOLOv8, OpenCV, NumPy* **2026**

- Developed a computer vision system using YOLOv8 and OpenCV to detect and classify Braille characters from images.
- Applied image preprocessing techniques including noise reduction and contrast enhancement to improve recognition accuracy.
- Built an end-to-end solution that converts detected Braille patterns into readable text, enhancing accessibility for visually impaired users. 🔗 [Click Here](#)

Airline Reservation System | *Node.js, Express.js, SQLite, HTML, CSS, JavaScript* **2026**

- Developed a full-stack airline reservation system featuring secure user authentication, flight search, and online ticket booking.
- Designed RESTful APIs using Express.js and managed booking data efficiently with SQLite and SQL queries.
- Built a responsive user interface with real-time booking workflows, improving user experience and system usability. 🔗 [Click Here](#)

Awards & Certifications

- **Microsoft Certified: Fabric Data Engineer Associate (DP-700)**
- **IEEE MOVE STEM Program** – Selected to participate in the IEEE MOVE STEM Program at Bengaluru.
- **IEEE Smartathon 2026 Ambassador**

- IEEE Student Member
- NPTEL: Python for Data Science
- Infosys Springboard: Python Fundamentals & Artificial Intelligence Fundamentals

Education

Acropolis Institute of Technology and Research, Indore	2024 – 2028
<i>B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning)</i>	<i>CGPA: 8.38 / 10</i>
Career Academy School, Indore	2023 – 2024
<i>Class XII (MP Board)</i>	<i>Percentage: 87.2%</i>
Career Academy School, Indore	2021 – 2022
<i>Class X (MP Board)</i>	<i>Percentage: 86.6%</i>
